

JVC America uses Attendance Enterprise™ time and attendance systems, distributed by Gorrie-Regan & Associates, an InfoTronics dealer located in Birmingham, Ala. This system is installed in the JVC facility located in Tuscaloosa, Ala.

“InfoTronics understood our complex rules structure as required in our manufacturing environment.”

Paula Horton
Manager of Compensation and Benefits
JVC America

JVC America is a leading provider of videotapes and CD discs based in Tuscaloosa, Ala. With a work force exceeding 600 employees, accurate payroll processing is extremely important. An error of just 1% in payroll can cost the company thousands of dollars and impact employee confidence in the accuracy of their paycheck.

“Our legacy timekeeping system was beginning to be a maintenance burden on our staff internally. We wanted a company with a track record of solid support to their customers to lessen the internal cost of ownership to JVC,” states Paula Horton, Manager of Compensation and Benefits at JVC. “They were also able to demonstrate to us that they understood our complex rules structure as required in our manufacturing environment and could automate it through the InfoTronics Attendance Enterprise system.”

The system uses advanced technology with Microsoft SQL Server database structure and full Ethernet terminal connectivity throughout their facility. The payroll hours data electronically downloads to their Software Plus payroll system running on an IBM i-Series server.
